

CRESCENDO CORPORATION launches in India

FIRE SUPPRESSION SELF-RESCUER GEL CAPE

«MANTOS»

Fire Fabric with special nano technology treatment

Designed and manufactured by PiroChimika JSC, Moscow Russian Federation

Joint-Stock Company "PiroChimika"
107045, Russia, Moscow, p.o.b. 102, e-mail: www.pirohim.ru

The company PiroChimika was awarded the silver medal at "The Day of Advanced Technologies and Innovations in system of EMERCOM of Russia" for the creation of MANTOS Gel based fire extinguishing cape.

NEW FIRE SUPPRESSION TECHNOLOGY

Easy and safe to use

The only effective way to extinguish
burning clothing on the body and local fires

Designed for:

- Extinguishing fire sources of A and B classes, including in crowded places.
- Personal protection during evacuation from burning objects.
- Extinguishing fire on clothes on the human body.
- Extinguishing Kitchen and Restaurant fires.
- Useable as a stretcher for evacuation of personnel during fires.
- Easily carried in a pocket.
- Personal protection for passengers in buses and trains.
- Very useful for homes, offices, movie halls, malls, function halls and factories

THREE FIRE EXTINGUISH EFFECTS:

- Cuts-off oxygen
- Cooling effect
- Combustion inhibitor

Technical characteristics

"MANTOS" is a special fireproof fibreglass fabric with water based gel impregnation. The fire extinguishing agent is a ferrous based combustion inhibitor with active radical receptors which extinguishes fire.

S.No.	Technical details	MANTOS			
		M101 1000 × 1000	M102 1000 × 1500	M103 1500 × 2000	M104 1200 × 1800
1.	Dimensions, mm				
2.	Base of Fabric	Fireproof Fabric			
3.	Gel properties	Fire extinguishing gel with active absorbers of heat			
4.	The time of contact resistance with a solid surface heated up to 500 °C	Not less than 30 sec.			
5.	The time of resistance to open fire	Not less than 15 sec.			
6.	Operating and storage temperatures	From -30 °C till +50 °C			
7.	Storage life	24 months
